IV. Seed Fund Requests

- J Hoang, Multicenter Registry Comparing Preoperative Imaging for Primary Hyperparathyroidism *Susan will find out about pay to fellow; send example from Jenny to Susan; Susan to identify an underfunded Research Assistant; defer to June meeting*
- J Stewart/C Kim Percutaneous creation of an extraluminal non-anatomic subcutaneous prosthetic arterial bypass graft: Feasibility in a swine model

Both seed fund requests from the April 14 meeting were addressed with the PI/Resident. J Hoang has changed the budget so that all of the funds will go to a fellow or resident and has provided an example of how that has been done. The budget is for one year although the project will be longer provided she is able to get funding elsewhere later. The REDCap creation is problematic for her to do herself because she is not doing it from scratch. It has already been created by a UCLA person. She plans to apply for the Faculty Flex Voucher Program to help with the REDCap transfer to Duke.

J Stewart received a grant from RSNA and withdrew her seed fund request.
