This program is designed to provide a comprehensive review and update of both established breast imaging modalities along with advances in state-of-the-art techniques. A complete discussion — with emphasis on practical advice — of analog and digital mammography, breast ultrasound and interventional techniques will provide a strong foundation to advance to newer technologies. Identifying the role and interpretation of breast MRI will be given special attention.

**EDUCATIONAL GOALS**

After attending the course, participants should be able to:

- Discuss the newest techniques being utilized to diagnose and treat diseases of the breast.
- Recognize the newest techniques being implemented in breast imaging.
- Meet their yearly requirements for accreditation.

**DISCLOSURE**

It is the policy of the Duke University Health System Clinical Education & Professional Development to require the disclosure of anyone who is in a position to control the content of an educational activity. All relevant financial relationships with any commercial interests and/or manufacturers must be disclosed to participants at the beginning of each activity.
