A Comprehensive Review of Musculoskeletal MRI

March 13–16, 2017
The Regent Palms, Turks & Caicos

17 SA-CME HOURS AVAILABLE
This course is an intensive review and update of musculoskeletal MR imaging techniques. The speakers will review the current “status of imaging specialized anatomic areas such as the knee, wrist, shoulder, spine, foot and ankle. Design and implements of musculoskeletal imaging protocols will be discussed. This will provide an excellent opportunity for the practicing radiologist to review the current imaging procedures as well as expose them to the newest procedures and modalities being used.

TARGET AUDIENCES – Radiologists performing musculoskeletal MRI

LEARNING OBJECTIVES – At the conclusion of this activity, participants should be able to:

➤ Discuss the current musculoskeletal MR imaging procedures.
➤ Design and implement appropriate musculoskeletal imaging protocols.
➤ Apply the current advances in musculoskeletal imaging to diagnosing disease processes in the elbow, knee, wrist, shoulder, spine, hip, foot and ankle.

We are pleased to offer 17 hours of Self-Assessment Modules (SAMs) which meet the ABR’s criteria for self-assessment activities in the ABR Maintenance of Certification Program.
